

# Monthly Budget Planner

A simple printable planner · [MegaCalcOnline.com](https://megacalculator.com)

## Income

| Item                       | Budgeted (\$) | Actual (\$) |
|----------------------------|---------------|-------------|
| Salary / wages (after tax) |               |             |
| Other income               |               |             |
| Government payments        |               |             |
| Total income               |               |             |

## Essential Expenses

| Item                                | Budgeted (\$) | Actual (\$) |
|-------------------------------------|---------------|-------------|
| Rent / mortgage                     |               |             |
| Utilities (electricity, gas, water) |               |             |
| Groceries                           |               |             |
| Transport / fuel                    |               |             |
| Insurance                           |               |             |
| Phone / internet                    |               |             |
| Minimum loan / card repayments      |               |             |

## Lifestyle & Savings

| Item                        | Budgeted (\$) | Actual (\$) |
|-----------------------------|---------------|-------------|
| Dining out / entertainment  |               |             |
| Subscriptions               |               |             |
| Savings / emergency fund    |               |             |
| Super contributions (extra) |               |             |
| Other                       |               |             |

Tip: fill "Budgeted" at the start of the month, then track "Actual" as you go. Aim to have income cover essentials first, then split what remains between lifestyle and savings.
